

## Features of Infinity Series Stainless Steel Sinks

- Infinity Series sinks are pressed/drawn from appliance grade **Certified 304 Stainless Steel** to better **Match Appliances**. Many sink companies use 301 stainless that has less chromium and less nickel. Those sinks are not as bright and turn dull quickly and stay that way.
- Infinity Series sinks are **Individually Pressed** making all four sides equal thickness, then welded. This process makes Cygnet sinks stronger, heavier and quieter
- Rated for up to **1.5 HP Garbage Disposals**
- The finishing process is **Fully Automated** for consistency.
- All Cygnet sinks have **Eco-Friendly Bottom Coating** and have an **Exclusive Bottom Thermal Pad**.
- **Sound Reduction Technology** utilized in the automotive industry. We do not use recycled tires like some companies that cause foul odors in the sink cabinet.
- **Cygnet Stainless stands behind all their products** with a Limited Lifetime Warranty on the finish.
- Infinity Series sinks are **Certified by an Independent Lab** to meet building codes in the United States and Canada.
- Unlike Cygnet Stainless Steel products many sinks are unbranded, not certified, or do not meet codes
